

Autonomous Shuttle Demonstration

FARMERS RIDE! Come out and ride the autonomous, self-driving 11-passenger Navya Autonom Shuttle, Ags!

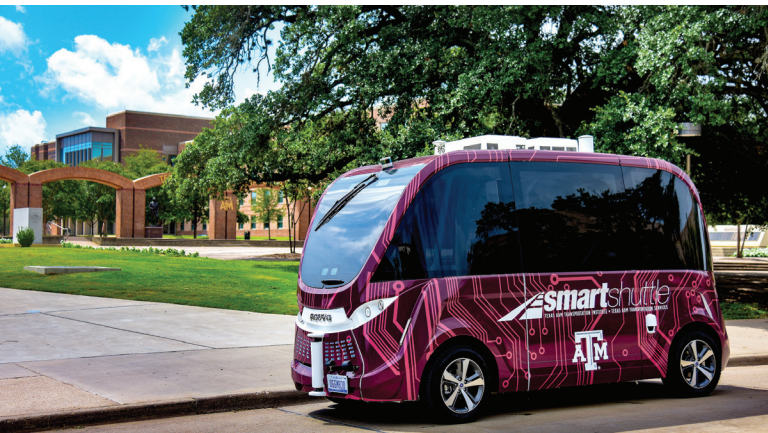

The shuttle uses the latest technology to “drive itself” and its passengers, avoiding obstacles like pedestrians and bicyclists. A safety operator is onboard at all times to take control of the shuttle in the case of an emergency. This public deployment will carry passengers along a route near the Corp of Cadets dorms and Southside Garage on Texas A&M University’s main campus.

The shuttle will also be on static display in the Texas A&M Fan Zone prior to the Texas A&M vs. Lamar home football game on Sept. 14 and the Texas A&M vs. Mississippi State home football game on Oct. 26.
